April 17, 2020 Project Update

South Lake Shore Drive Reconstruction

Village of Fontana-on-Geneva Lake

Construction on the storm sewer line in the Abbey Springs Marina is finishing up and will temporarily terminate in a storm manhole on S Lake Shore Drive. For the week of April 20th water main relay work is proposed to begin in S Lake Shore Drive at Walworth Ave and continue progressing to the east before heading up Brickley Drive. Storm sewer work is proposed to start at the beach area east of the Pottawatomi Creek channel and includes a large mechanical storm water quality manhole structure. S Lake Shore Drive between Shabbona Drive and Indian Hills Road will be closed to through traffic during active construction. Sanitary sewer rehabilitation work is also continuing throughout the project limits and may require temporary lane closures.

We Energies is continuing to relay (replace) the existing gas main along S Lake Shore Drive and is proceeding from west to east. The gas line relay work is not a Village project. Other private utilities may be onsite during the project including electric, cable or telephone, however those utilities are not proposing any changes except for minor adjustments to relocate conflicting poles or lines.

Feel free to contact the Village at (262) 275-6136 with any questions.
